Education

Dr. D. Y. Patil Institute of Technology, Pimpri
B.E. in Information Technology
Pune, Maharashtra

2022 - 2026
CGPA: 8.5

Experience

Spring Boot Developer Trainee Capgemini

Jan 2026 Apr 2026

- Completed enterprise training in Core Java, Spring, Spring Boot, AWS, Kubernetes, Docker, PostgreSQL, MySQL, and Microservices.
- Built backend services and microservice based applications using Spring Boot, PostgreSQL, Docker, and REST APIs in collaborative team environments.
- Successfully cleared all evaluation criteria including M1 and L1 technical assessments.
- Lead a team project, coordinating development tasks and delivering the project successfully in a collaborative environment.

Data Science Intern Physics Wallah

Nov 2024 Feb 2025

Remote

- Developed credit risk prediction models using Random Forest, XGBoost, and SVM achieving **85% accuracy**.
- Built end to end ML pipelines including ingestion, preprocessing, validation, model training, and evaluation.
- Worked extensively with Pandas, Scikit learn, and Jupyter Notebook on production style workflows.

Projects

Hospital Management System HMS Backend Java Spring Boot MySQL JWT Hibernate

2026

- Engineered a modular monolith backend using Spring Boot and Java ensuring separation across 10 plus domains including Patient, Physician, Pharmacy, and Room Management.
- Implemented stateless authentication using Spring Security and JWT with role based access control.
- Designed relational database schemas using MySQL, Spring Data JPA, and Hibernate.
- Developed 50 plus RESTful APIs with Swagger documentation, exception handling, and AOP based logging.
- Integrated monitoring and tracing using Spring Boot Actuator and Zipkin.

RTI Agent Agentic AI Retrieval Platform LangChain LangGraph FastAPI MongoDB Groq Gemini

2025

- Built an agentic AI system to automate RTI filing, retrieval, and government information workflows using multi agent orchestration.
- Designed LangGraph based agent workflows integrating Classifier, Formatter, InfoFetcher, and Tracker agents with contextual routing.
- Implemented RAG pipelines with embeddings, vector retrieval, metadata filtering, and structured memory for accurate information retrieval.
- Integrated Groq and Gemini LLMs with tool calling, reasoning workflows, and structured outputs for intelligent automation.
- Achieved 90% classification accuracy and reduced RTI filing time from 30 minutes to under 1 minute.

PratibimbAI Agentic AI Content Generation Platform LangGraph FastAPI Multi LLM

2025

- Built a production grade agentic AI platform to scrape, retrieve, rank, and transform web and YouTube data into structured social ready content.
- Designed multi agent workflows with asynchronous execution, retry handling, fallback logic, and contextual memory.
- Implemented multi LLM orchestration using OpenAI, Gemini, and Groq for reliable generation and tool driven reasoning.
- Developed scalable RAG style retrieval pipelines using embeddings, content extraction, ranking, and prompt orchestration.

LMS Chatbot LangChain RAG Generative AI FastAPI

2025

- Developed a RAG based academic assistant supporting contextual question answering, recommendations, and intelligent search.
- Implemented embeddings, retrievers, vector databases, and prompt orchestration for accurate retrieval workflows.
- Built modular APIs with FastAPI enabling scalable conversational AI interactions.

Technical Skills

Languages: Python, Java, JavaScript, SQL

AI Engineering: LangChain, LangGraph, Agentic AI, Multi Agent Systems, Tool Calling, Prompt Engineering, LLM Orchestration

RAG Systems: Embeddings, Vector Retrieval, Chunking, Retrieval Pipelines, Context Engineering, Semantic Search

Backend: FastAPI, Spring Boot, REST APIs, Spring Security, Hiber-

nate

ML DL: Scikit learn, TensorFlow, PyTorch, Hugging Face

Databases: PostgreSQL, MySQL, MongoDB, VectorDB

Cloud and Infra: AWS, Docker, Kubernetes, GitHub Actions, Linux

Data Systems: Pandas, NumPy, Data Pipelines, Metadata Extraction, Schema Validation

Achievements

Amazon ML Challenge 2025 Top 3% Nationwide Rank 2250 out of 82000 participants

2025

Designed a hybrid ML DL system for Smart Product Pricing using transformer based text embeddings and CNN based image feature extraction. Built distributed GPU workflows to overcome compute limitations.
